

It is our great pleasure to give this testimonial for Glen and his 21st Century staff. We met Glen approximately 3 years ago through our financial accountant. My wife and I were sceptical of investment properties/scheme. We received a lot of invitations from property investment firms. We ignored them and we never attended these meetings that were held for large groups.

Glen only invited my wife and myself. Glen went through both the details of both the strengths and weaknesses of property investment. Glen advised us on what he thought we should do and not do with the investment. He provided us an honest personalised advice. Glen was aware that this was our first investment property. We had built our current residence also but with another company. We wanted to invest in two properties as we had enough financial assets but surprisingly Glen strongly advised us not to. He strongly advised us to invest in only one for the moment. See how the process is and whether we were happy with it before investing in further properties. We met with Glen 3 times before we made a final decision. The above conversation with him was during our third meeting. After that meeting we felt that our investment money was in safe hands.

We bought the land and investment property as Glen advised. The house was completed on time and without stress. Glen's plan was perfect from start to finish. He did not waste our money and time. Within a few weeks of completion of our house we had tenants for 12 months.

Before and during our construction period we received regular updates from Glen email and photo reports. We have not committed to build another investment property at the moment but when we build another one we will build it with Glen.

We are not surprised Glen and his company has thrived this long in a very competitive market. We believe this is because of his personal touch and his puts himself in your shoes does not waste your money and is very honest about his work and the investment.

We definitely recommend our friends and family to do business with Glen and any other property investors that are looking for a stress free and great investment.
