

TESTIMONIAL

We had very little idea about whether or not we could afford an investment property.

We were also wary of having to deal with property developers - especially if our property would be in a different State than the one we reside in - along with having to deal with banks.

When we finally decided to test the waters, we were introduced to Glen.

Glen was very thorough on the finer details of investing in a property; he allowed us to see that it could be done and wasn't the scary financial burden we made it out to be.

After taking the plunge, Glen was with us every step of the way, guiding us, informing us of next steps and always prompt with replies to queries or concerns we had during the course of the development of our property.

From beginning to end, his commitment and that of his staff was exceptional. They were truly transparent and professional in dealing with banks, developers or any nature of our concerns.

Even before the completion of our property, tenants were found. We couldn't be happier with our first purchase and will most certainly utilise the services of **21st Century Property Investments** regarding our second property.... hopefully soon.

Regards

The Kourie family
