

15th August 2003

To Whom it May Concern.

If you are looking into investing in property we can certainly recommend Glen Wambeck of 21st Century Investments. We decided we needed something for our retirement and we were very wary of some of the seminars that we had been to, so we decided to visit our Accountant/Financial adviser. He told us of a few options but he was very enthusiastic about the high growth in property in the Brisbane area and so he asked Glen to give us a call.

When Glen came to see us we were very unsure about investing in Queensland but after listening to Glen and doing some research of our own we found that everything he had told us was true, there are areas to invest in Queensland and there are areas you don't invest in. Brisbane was the spot and especially Forest Lake. We flew to Brisbane shortly after our meeting and met Glen at the airport from there we went to North Lakes then down to Forest Lakes. We preferred Forest Lakes. We picked out our block from the several we were shown.

From then on things just rolled on like clock work. Glen's company was very efficient and helpful. He was always there for us.

We have built several project homes but we must say this exercise was so unbelievably easy, we just could not get over the whole thing. Glen was just great. It was so refreshing to find that there are still some genuine people out there.

If you are thinking of investing in property we have no hesitation what so ever in recommending 21st Century and Glen and we are looking forward to dealing with Glen again.

Yours faithfully
