

From our first meeting with Glen, his presentation of investment opportunities in Springfield Lakes, Queensland was very thorough, and Glen's friendly manner and deep knowledge of the area was both reassuring and very professional.

On our first visit to Springfield Lakes, Glen introduced us to Lorne Phillips from Lend Lease who showed us some of the blocks of land that were for sale.

Glen showed us around Springfield Lakes, pointing out the community facilities and infrastructure that had already been built, and the infrastructure developments planned for the near future.

He also explained the financing and purchase options comprehensively, and prepared a construction program for our property meeting the construction milestones at every stage.

In my forty years working in the construction industry as a design professional, it is rare to find a competent and trustworthy builder who delivers on his promises, and to a high standard of workmanship.

Glen's attention to detail has produced a finished home of exceptional quality, on time and on budget.

Moreover, Glen's team at 21<sup>st</sup> Century Property Management found tenants for both properties within three weeks of completion of construction. The service provided by both Glen and his team could not have been better.

Throughout the entire process, Glen made sure that all our concerns and questions were promptly answered and assured us that we could contact him at any time, even after construction was completed. It is this kind of customer service that sets Glen and his team above the rest.

We therefore have no hesitation in recommending Glen and 21<sup>st</sup> Century Property Group to anyone thinking of investing in property. We could not be happier with our decision to place our trust in Glen and his team.
