

7th December, 2018

My wife and I didn't know a great deal about investing in property. We had bought our own home but didn't understand how to invest in property. We were looking to build a portfolio, but didn't know where to start.

Glen and his team made this easy and simple. From initial contact we were impressed with not only the team but the way in which Glenn deconstructed our complex financial situation and explained what would and would not work for us.

Glen travelled from Sydney to meet us in Newcastle multiple times and presented us a number of options which his team had researched. Along the way we had numerous questions and to Glenn's credit he had the patience to educate and mentor. We were the high maintenance first time investors.

After we said yes Glen assisted us in finding financial backing and paying land deposits with the selling agent. It wasn't long until we were selecting colours, themes finalising the details of the build.

Life moved on as normal and with excitement we would periodically receive an email from Glen and his team. They contained photos of our home under construction through all the different stages.

Just over 6 months later we had our house and Glen was organising the handover to the tenants that had been on standby from the property for 3 weeks! It's been smooth sailing since.

The stability of the investment was the highlight for us. No hassle, simple, zero stress and no regrets

Byron and Maddy
